Changes around Us

Introduce the concept of reversible and irreversible changes to your students through the clear demonstrations provided in this short animated clip.

Reversible and Irreversible Changes

This video explores reversible and irreversible changes by examining cutting, melting, burning, folding, and stretching of rubber bands, paper, and candles.

Air and Its Uses

We breathe it every second of our lives – but besides that, what purpose does air serve? Discover how air is a gas in this Miniclip, and the variety of purposes it serves for both humans and animals. It also looks at the use of wind as a renewable energy source, and the ways we can protect our air from becoming polluted. This Miniclip is perfect for exploring air as a natural resource, a state of matter, and a means of transport.

Feathered Friends: Learning about Birds

You see them soaring in the sky, and you hear them chirping in the trees – but what are they? They're birds! This Miniclip looks at the common features of birds, including feathers, beaks, feet, and wings, and the nests they live in. Brilliant animations and striking footage provide your students with an idea of the vibrant, colourful world of our feathered friends.
